Risk Scoring Methodology

Risk scoring is a three part process which identifies the **likelihood** and **consequences** of the risk happening, and combines these to produce a **Risk Rating**

| Step 1: Likelihood of Risk | | | Step 2: Consequence of Risk | | | |
|----------------------------|-------------------|---|-----------------------------|------------------|--|--|
| Score | Level of Risk | Assessment | Score | Level of Risk | Assessment | |
| 1 | Rare | May occur in exceptional circumstances | 1 | Negligible | Consequences can be dealt with through routine activities | |
| 2 | Unlikely | Is not expected to occur | 2 | Low | Impacts on a limited area of activity | |
| 3 | Possible | Could occur at some point | 3 | Moderate | Moderate impact on achievement of the goals or objectives | |
| 4 | Likely | Would probably occur in most circumstances | 4 | High | High impact on achievement of the goals or objectives | |
| 5 | Almost Certain | Is expected to happen in most circumstances | 5 | Extreme | Significant impact on achievement of the goals or objectives | |
