Subject: Lenzie Academy Rebuild

Good Morning

I wish to register my objection to the proposed build at Whitegates Park.

I support strongly the approach used in various other school rebuilds , i.e. a tandem build.

I live in Lenzie and use this park on a daily basis and would not want to lose such an amenity.

My objections are based on lots of things

The cost.

The irreversible habitat loss

The fact that this site was deemed unviable only a few years ago and nothing has changed.

The well known flooding problem if the site is disturbed

The lack of parking for proposed school

The real possibility of finding even more toxic problems if building commences.

The approach seems to be cover the problem and build anyway.

The size of the school , as I understand it if placing requests were reduced then overall cost is significantly reduced.

Finally ,

I believe that the voices of the local people must be heard on this subject . EDC should not simply push ahead in the belief that they know better .

Regards
