Stance: Customer objects to the Planning Application

Comment Reasons:

Comment: I would like to submit a formal objection towards TP/ED/26/0104 due to cost and significant environmental impact in relation to loss of mature habitat and increased risk of flooding.

Costs are well documented and seem to be increasing the more detailed the planning becomes. I don't feel a full financial benefit analysis has really been thought through.

The environmental impact of losing such a mature area of mixed habitats would be disastrous and I really implore those making the decisions to walk the park. The bird song in the morning at the south end of the football pitch near the marsh area is glorious. This can't be replaced by throwing money at a new park.

The increased risk of flooding seems like an unnecessary risk and stress to impose on people. The last flooding in the area was catastrophic to those living there at the time and we should learn our lessons from the past.

Reviewing what I can of the documentation I don't see how this cannot be located at current location if planned and run properly.

Yours,
