Proposal: Erection of a secondary school including road access, landscaping, car parking, sports pitches, recreational areas and associated development.

Case Officer: Fraser McNair

Comment Details

Commenter Type: Member of Public

Stance: Customer made comments in support of the Planning Application

Comment Reasons:

Comment: I fully support all the Council's proposals in relation to the new build on the proposed site.

The extremely detailed, well researched and properly funded proposal to build a new school on the Whitegates site will meet the needs of children and families for generations.

The professionalism of all the experts involved in planning the new build on the identified site has ensured that due care and attention has been given to all relevant factors then known. The concerns now being expressed in relation to alleged contamination, and concern in relation to the need for assessment of flood risk can, and will be, properly addressed. I say this as I am certain that all professionals will ensure that proper assessments of these matters will be carried out, and remedies applied, if necessary.

(I would strongly object to any proposal or suggestion that the new build Lenzie Academy be located on the site of the present Lenzie Academy, and being build in phases, whilst pupils and staff were in nearby buildings. Health and safety of pupils, staff and others, and the disruption to all these groups would be completely unacceptable.)

Finally, I would express the hope that EDC and all the professionals involved are given the time, and respect, to proceed.

Thank you.
