Good afternoon,

I am noting an official objection to Lenzie Academy being built on Whitegates Park. My objection is from evidence based concerns held widely by those living in Lenzie. These include but are not limited to ;

1. Health and safety : site contamination. There has been lack of transparency from the council in this respect and contradictory outcomes given.
2. Flood risk : lack of risk assessment despite early & ongoing concerns raised by the community. SEPA has now asked for a holding objection due to a lack of risk assessment and understanding of the environment including future planning in respect of increased likelihood of extreme weather and flooding.
3. Traffic congestion : Overlooked and not appropriately considered in terms of the environmental impact within the local community.
4. Escalating costs for new build: unnecessary and wasteful of council and citizens money due to the abnormal ground conditions and site contamination. It's only going to get more expensive.

Please confirm receipt of this email.

Yours sincerely
