Proposal: Erection of a secondary school including road access, landscaping, car parking, sports pitches, recreational areas and associated development.

Case Officer: Fraser McNair

Comment Details

Commenter Type: Neighbour

Stance: Customer objects to the Planning Application

Comment Reasons:

Comment: I wish to object to this planning application.

Concerns Regarding School Footprint Calculation

The space calculated for the footprint of the proposed school appears to include areas that are either unusable or encompass public paths. It seems that the boundaries have been extended to their absolute limits, which raises significant concerns about the accuracy and appropriateness of the space allocation.

Inconsistencies in Park Size Reporting

Upon reviewing both current and previous online reports related to the park, it seems the park's size has been increased unexpectedly in order to accommodate the school's footprint. This sudden expansion is questionable and merits closer scrutiny.

Conflicting Calculations and Reporting Errors

It is notable that there are numerous conflicting calculations and errors present across the various reports submitted by different departments and contractors. The presence of these discrepancies further undermines confidence in the planning application and calls into question the reliability of the supporting documentation.
