I am sending this email because I cannot believe in this day and age with climate change and conservation that this council is even considering destroying a well used park with wildlife living happily and people like myself walking their dogs and chatting. There is no reason why the new school can't be built on original grounds. I stay in [REDACTED] and a school nearby is not an issue with me but I don't like the idea of taking away a key part of my life with my dogs. I've seen deer and a heron. Has Donny Trumpet flew in because this is what he would do. Remember you have been elected by the people of East Dunbartonshire and unless reason prevails that can be changed very soon.
