Stance: Customer objects to the Planning Application

Comment Reasons:

Comment: I do not want a school built on this park. This is a wildlife corridor for many wildlife using this green space. The bird life including greenfinches is declining by 65% since 1990. The proposed development risks further degrading or removing habitat that is already under strain. Parks like this are not only valuable for biodiversity but also serve as critical refuges for species experiencing long term decline. This undermines ongoing conservation efforts.

Safeguarding this park is essential, not only for greenfinches but for the wider ecosystem that depends on it. Development should not come at the cost of irreversible environmental harm.
